Important note: The fifth grade test continues to be the test most students struggle with across the entire state. All students scored low in fifth grade; however, our students scored well above the state average, and are continuing to grow. The dip is likely a reflection of test design by the state, especially because students quickly rebound to higher proficiency scores in 6th grade. That being said, we take these scores seriously, and will be working with teachers to dig into this data and continue to address lesson design to support all of the fifth grade standards.
